

**GasStop is an emergency 100% shut-off device for bottled gas systems. In the event of a major leak, GasStop will instantly and automatically shut-off the flow of gas. Not only is this device an easy to fit, autonomous must-have safety device, it also has a useful multipurpose gas pressure indicator. Use LPG, use GasStop.**

**SAFE** – 100% automatic shut-off in the event of a major leak

**PRACTICAL** – Useful indicator shows you when your gas is running low

**EASY** – Easy to Install, easy to use

### 100% emergency shut-off

GasStop will instantly and automatically shut-off the supply of gas in the event of a major leak or system failure.

### Useful gas level indicator

The useful pressure gauge will let you know when gas is running low, letting you plan to replace by a filled cylinder.

### Minor leak tester

GasStop can also be used to test for minor leaks prior to use. Always check to make sure your gas system is leak free.

### Highly engineered

Every GasStop is made using the highest quality materials and the latest manufacturing and testing technology.

### Quality approved

Products are independently tested, in accordance with ISO and EN standards.

### 5 year warranty

All products come with a 5 year warranty. We are proud to provide the highest quality devices to all of our customers.

### Where to use GasStop?

Promote a lunch or dinner and cook with your friends and family with the added safety of GasStop. Do not risk running out of gas in the middle of the fun. With GasStop, you will not be surprised by the lack of gas because the pressure gauge will let you know when it is running out.

The use of gas cylinders is a good way to bring the comfort of your home to the outdoors. Use GasStop to increase the safety of your gas system and use a simple gauge to keep an eye on the gas level, simply and quickly.

Do you use a gas cylinder in your boat, or in your heater, or in your home? GasStop will increase the safety of your gas system, giving you peace of mind no matter what the use.

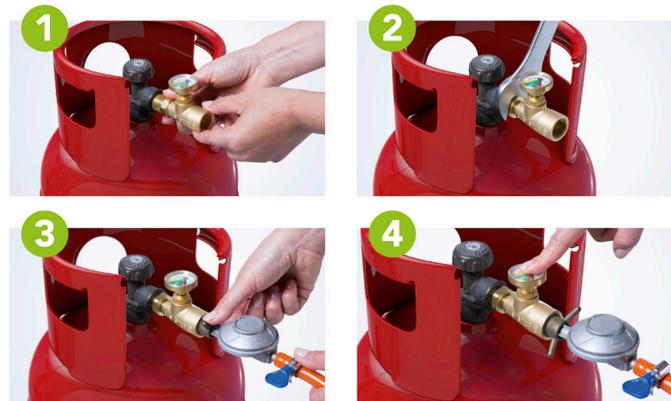

### Product range

- High pressure
- Enough gas
- Cylinder exchange soon

### Easy to use, easy to install

- 1 Connect the GasStop to your gas bottle
- 2 Tighten the GasStop using the correct tool
- 3 Connect your regulator (not an EFV regulator) to the GasStop and install your hose and device as usual
- 4 Switch the gas on and pump the gauge 4-6 times to prime the system
